

Event Magic Pro Release Notes

Issue #	Rel. Ver.	Type	Issue Description	Resolution
12	5.3.4	Incorrect Functionality	On Home screen, when you include Contacts and sub events, Prospective clients are displayed under active events	Fixed
13	5.3.4	Crash - No Data Loss	On Windows 7, get authentication failed when adding tables in table assignments	Fixed
14	5.3.4	Crash - No Data Loss	When you drop on a seated guest on a table, get runtime error	Fixed
10	5.3.3	Incorrect Functionality	Not able to delete events from timeline	Fixed.
11	5.3.3	Incorrect Functionality	Tutorials videos do not work. Message about missing codec	Refreshed videos to run via the web, and updated codecs.
9	5.2.1	Crash - No Data Loss	When trying to print completed events, get runtime error	Fixed
8	5.2.0	Crash - No Data Loss	Windows 7 ONLY: Getting "Authentication Failed" error at different areas of program.	Fixed
6	5.1.15	Incorrect Functionality	When printing actual budgets, some expense categories appear twice	Fixed report
7	5.1.15	Incorrect Functionality	Check for update sometimes reports update is available when it really is not.	Fixed
5	5.1.14	Incorrect Functionality	Budget and actual and budget totals do not match payment totals	This could occur when tax and tip were applied to line items. After installing the update, go to the budget screen and click on each detail button, and then close the window. This will update totals so that they are correct.
1	5.1.12	Incorrect Functionality	On Master Budget screen, Budget value can be \$0.01 off of the actual value	Fixed
2	5.1.12	Incorrect Functionality	When adding items to invoice, some items are not displayed, and filtering does not work when using logical operator <	Fixed. Had to remove filtering criteria.
3	5.1.12	Crash - No Data Loss	On Event Professionals screen in the finance section, might get runtime error 92 when clicking on a vendor that was assigned to an expense category	Fixed. Added code to check for null values in employees names

Issue #	Rel. Ver.	Type	Issue Description	Resolution
